

Duke Energy Landlord Experience

QUICK START GUIDE

The Duke Energy online Landlord Experience is designed for landlords and property managers to take care of their energy needs as quickly and conveniently as possible by:

- Streamlining the bill pay process
- Managing their properties related to tenant move-ins and move-outs
- Efficiently keeping the right people in the know on energy-related matters, like outages
- Tracking and managing energy usage and costs

GETTING STARTED

Registration for Existing Online Account Customers

Customers with existing online accounts can sign in using their current credentials and may find their accounts already set up in the **Landlord**, **Business** or **Home** tool.

- Existing accounts that you have previously set up on a Revert-to-Owner program (to automatically reestablish service in your name when a tenant moves out) may find their accounts already established in the Landlord Experience. In this case, when you log in you will already see “Landlord” as an option for selection. (See Experience Selector to the right.)
- Existing accounts on Residential rates that were not previously set up on a Revert-to-Owner program may be set up in the “Home” experience.
- Accounts with Nonresidential/Business rates will be found in the Business tool.

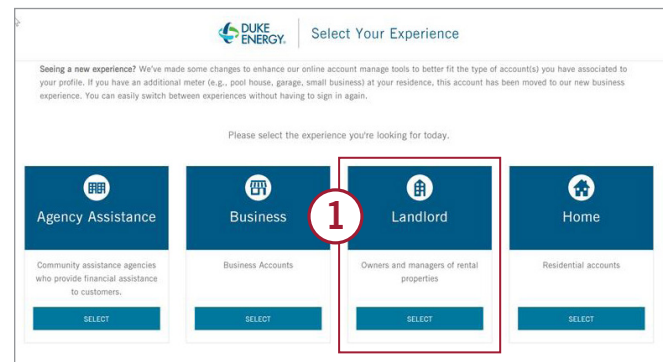

The "Register" screen features the Duke Energy logo and a "Register" link. Below the header, it asks "Which best describes you?" and presents six options with icons: Home (house icon), Business (storefront icon), Landlord (apartment building icon), Fulfillment Vendor (truck icon), Builder/Developer (hard hat icon), and Agency (grid icon). Each option includes a brief description: "I am a homeowner or renter with Duke Energy service.", "I own or represent a business with Duke Energy service.", "I am a landlord with Duke Energy services.", "I am a Duke Energy vendor.", "I am a builder in a Duke Energy service territory.", and "I am from an agency affiliated with Duke Energy." A "Cancel" link is at the bottom.

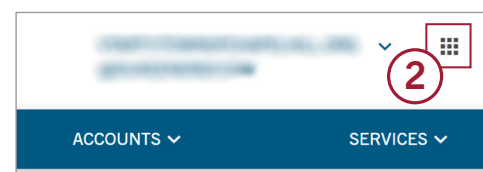

Key Points

Registered users can manage multiple account types across different experiences using a single sign-in ID – for example, Home, Business and Landlord.

- If you have accounts in multiple tools, you will see an experience selector page when signing in (1).**
- You can easily navigate back to an alternate experience by selecting the **experience selector** icon on the upper right portion of your dashboard within any of the tools (2).
- These setups are flexible, and accounts can be moved to fit the way you want to work.** If you want accounts set up differently, please contact our Business Customer Service team (duke-energy.com/customer-service/business) so we can help make that happen.

The "Select Your Experience" screen features the Duke Energy logo and a "Select Your Experience" link. Below the header, it includes a note about switching experiences. It then asks "Please select the experience you're looking for today." and presents four options: Agency Assistance, Business, Landlord, and Home. Each option has a description and a "SELECT" button. The "Landlord" option is highlighted with a red box and a red circle containing the number 1.

The dashboard navigation bar features a user profile icon in the top right corner, which is highlighted with a red box and a red circle containing the number 2. Below the profile icon are two dropdown menus: "ACCOUNTS" and "SERVICES".

Registration for New Users Without an Existing Online Account or Who Want to Add the Landlord Experience to Their Account

1. Go to duke-energy.com/register.
 2. Select **Landlord (1)**.
- **Choose 'Yes'** if some or all of your properties are already enrolled in **Revert-to-Owner (RTO)**.

Note: The **Revert-to-Owner (RTO)** program automatically reestablishes service in your name when a tenant moves out. Different Duke Energy regions have called it by different names previously. Check 'Yes' if your accounts have been enrolled in this type of program – even if it had a different name.

If you already have properties enrolled in RTO, those properties will be visible in your experience once your profile is established. You will also be able to add additional properties that are not RTO-enrolled.

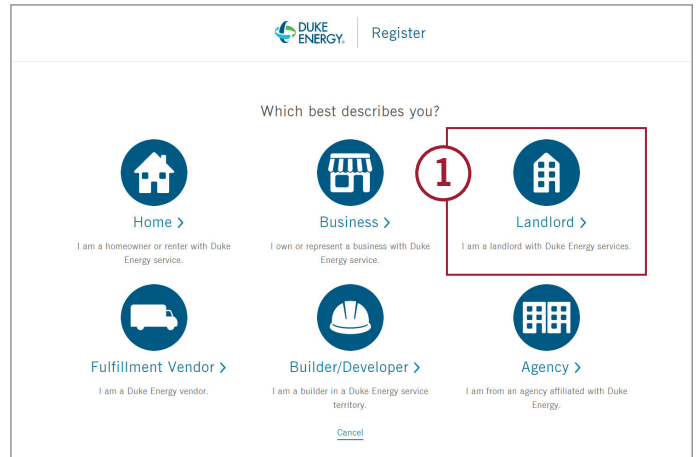

- **Choose 'No'** if your properties need to be set up for the first time and/or you are not enrolled in RTO.

Note: If you do not currently have a Revert-to-Owner agreement but want one, you will be asked to add your properties to the Landlord Experience where you can then enroll easily.

If you chose Yes:

- Indicate how the previously enrolled RTO account(s) can be found (i.e., Social Security number or federal tax ID).
 - » If SSN is provided, you will be asked to also provide the ZIP code.
 - » If tax ID is provided, you can also provide a service address or your 12-digit account number for one of the properties enrolled in RTO.
- Select the account(s) you wish to register with your online profile.

If you are not seeing all of your accounts or require additional assistance, please visit Business Customer Service (duke-energy.com/customer-service/business) so we can help you with set-up.

Dashboard

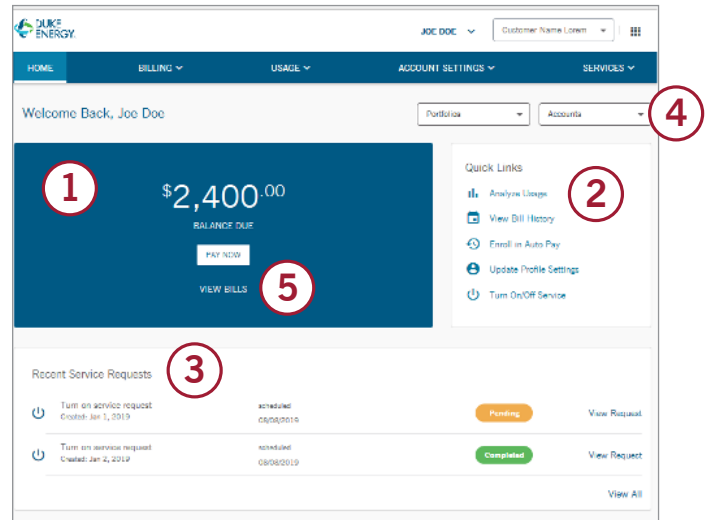

Upon sign-in, you will see a dashboard view of your accounts, enabling quick access to key information and functions, including:

1. **Total balance due** based on the individual account or portfolio of accounts selected (1).
2. **Quick links** to navigate to high-frequency transactions and functions such as updating profile settings (2).
3. **Status of recent service requests** associated with the selected account (3).

This dashboard will default to a preselected view of an individual account or portfolio of accounts.

4. **To change the accounts summarized**, select the appropriate account from the drop-down menu located in the top-right corner (4).
5. **To see a list of your accounts**, select View Bills in the Balance Due window (5).

Note: Most customers will be managing only one portfolio of accounts. This portal is also designed to meet the needs of larger businesses with multiple portfolios and business units. Additional guidance and tips for these customers can be found in a supplemental guide, “[Advanced Functions of the Online Business Experience](#).”

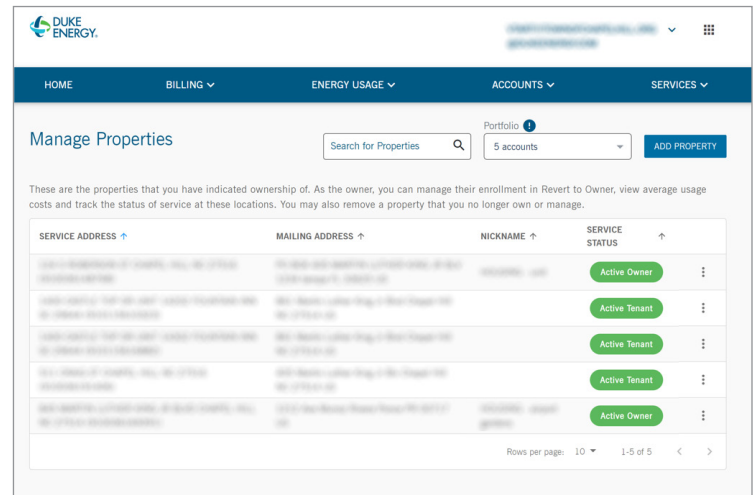

MANAGE YOUR PROPERTIES

Manage Properties Dashboard

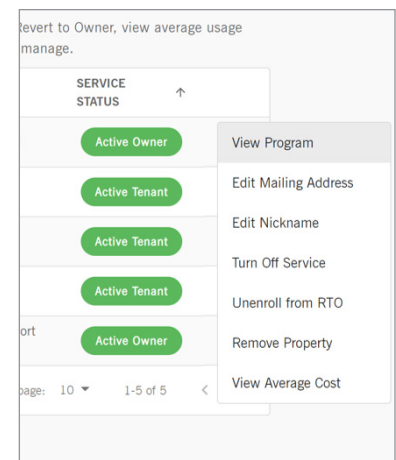

The Manage Properties dashboard allows you to view a full list of all properties associated with the Landlord Experience. To get to this view, select Accounts in the top menu, and then Manage Properties.

You can view the following details and make the following changes from this page:

- Add or remove a property from the Landlord Experience.
- View current service status.
 - » Active Tenant – Service active in a tenant's name
 - » Active Owner – Service active in the owner/landlord's name
 - » Inactive – No current service active at this property
- Manage service
 - » Turn off service (only in Active Owner service status)
 - » Turn on service
- Enroll/unenroll a property in Revert-to-Owner (RTO).
- Manage property information.
 - » Change a property mailing address
 - » View average energy bill for property
 - » Edit property nickname
 - » View billing and payment programs in which the property is enrolled (only in Active Owner service status)

SERVICE ADDRESS	MAILING ADDRESS	NICKNAME	SERVICE STATUS
1234 Main St, Anytown, NY 12345	1234 Main St, Anytown, NY 12345	Anytown, NY	Active Owner
5678 Elm St, Anytown, NY 12345	5678 Elm St, Anytown, NY 12345	Anytown, NY	Active Tenant
9012 Oak St, Anytown, NY 12345	9012 Oak St, Anytown, NY 12345	Anytown, NY	Active Tenant
3456 Pine St, Anytown, NY 12345	3456 Pine St, Anytown, NY 12345	Anytown, NY	Active Tenant
7890 Maple St, Anytown, NY 12345	7890 Maple St, Anytown, NY 12345	Anytown, NY	Active Owner

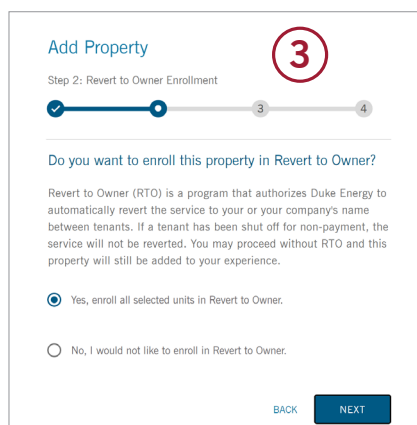

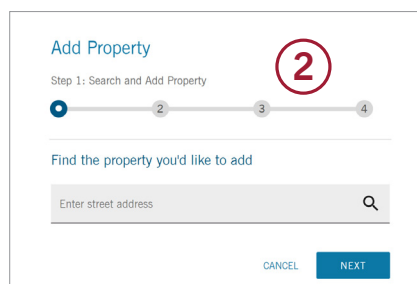

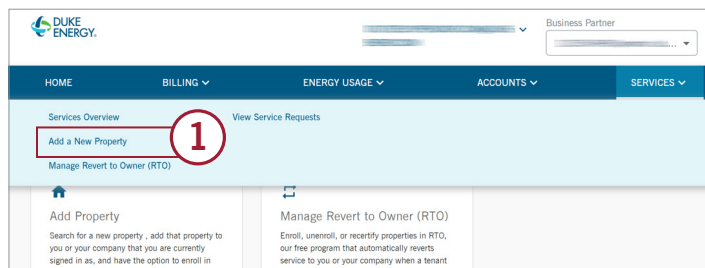

SERVICE STATUS	
Active Owner	View Program
Active Tenant	Edit Mailing Address
Active Tenant	Edit Nickname
Active Tenant	Turn Off Service
Active Tenant	Unenroll from RTO
Active Owner	Remove Property
	View Average Cost

Adding New Properties to your Landlord Profile

To add a property or unit over which you have legal title, follow these steps:

1. Select **Services** from the top navigation menu and **Add New Property** – or select **Add Property** on the **Manage Properties** page (1).
2. Search by property address to find and add a new property (2).
3. If desired, select to enroll the property in Revert-to-Owner (RTO) (see RTO section for more details) (3).
4. Review and confirm selections (screen not shown).

Note: If you have trouble finding or adding a property, or you require additional assistance, please contact Business Customer Service (duke-energy.com/customer-service/business) so we can help you with setup.

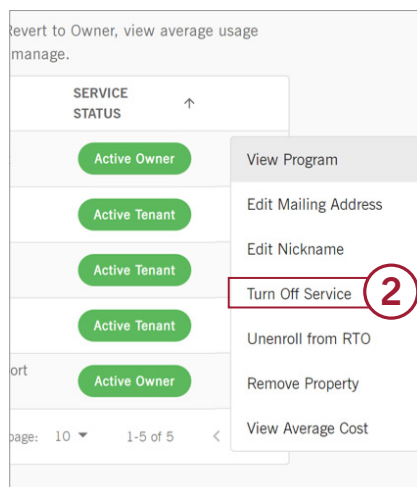

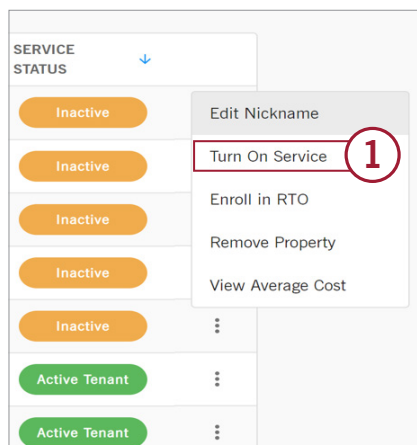

Start or Stop Service to a Property

The Landlord Experience also allows you to start or stop service for eligible properties. Locate the ellipsis (three dots) at the far-right column of each property row to choose:

1. Turn on Service – Applicable only when the service is noted as Inactive **(1)**.
2. Turn off Service – Applicable only when a property is listed as Active Owner. If the property is listed as Active Tenant, the landlord cannot turn off service to that property **(2)**.

Note: When service is active in tenant's name, you will not be able to view the name of tenant or see if service has been disconnected for nonpayment.

Enroll/Unenroll in Revert-to-Owner

The **Revert-to-Owner (RTO) agreement** is the formal contract into which a landlord enters when wanting service to automatically revert to landlord's name when a tenant vacates a property. The landlord agrees to take responsibility for charges incurred for the period of time service is active in their name.

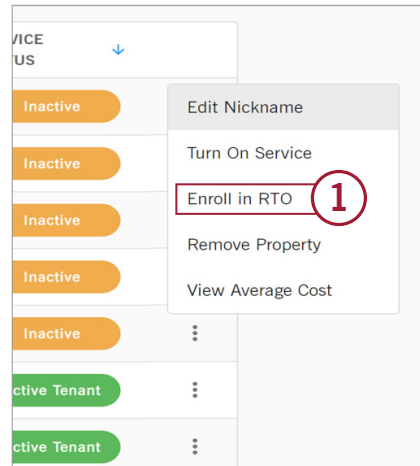

Enrolling a property in RTO can occur:

- During initial registration/adding a property to the Landlord Experience.
- On the Manage Properties page using the commands at the end of each property listing (see previous section) or through the 'Manage Revert to Owner' feature **(1)**.
- Using the Manage Revert to Owner page to enroll one or multiple properties at once.

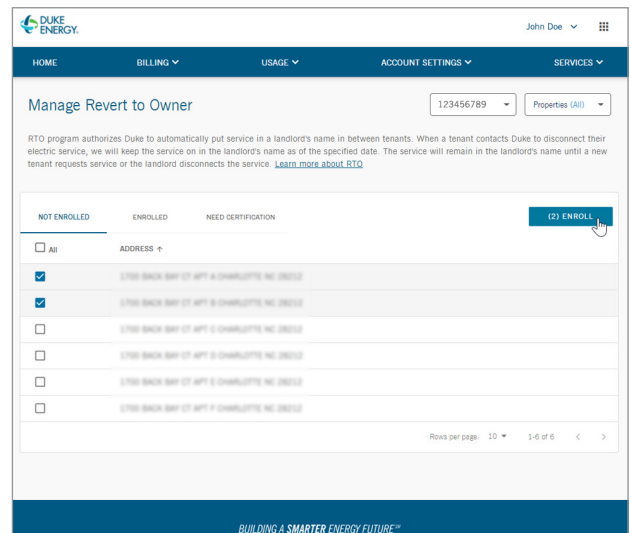

Navigate to the Manage Revert to Owner page by selecting Services and selecting Manage Revert to Owner (RTO).

Key points related to RTO enrollment:

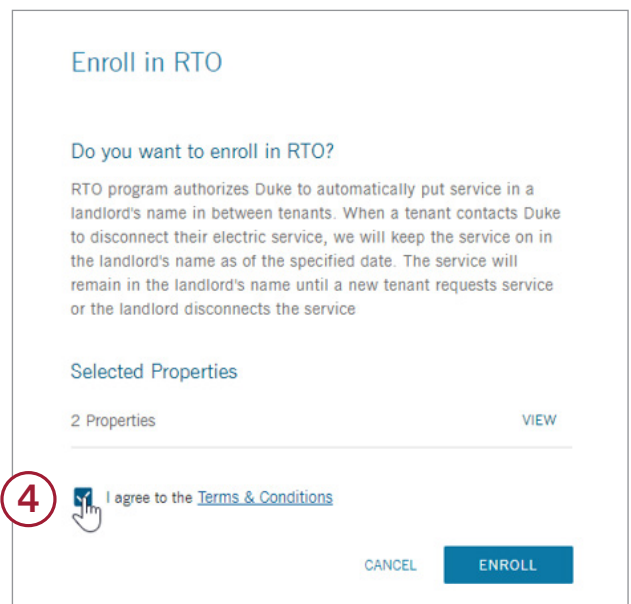

- By selecting the Enrolled and Not Enrolled tabs you can see which accounts currently fall into each condition. By selecting accounts with the check box and choosing Enroll or Unenroll as appropriate, you can move your accounts on and off the program **(2)**.
- You must review the Terms and Conditions of the RTO program and check the box to accept this information **(3)**. This box serves as the electronic signature acknowledging that you will adhere to all Terms and Conditions of the program **(4)**.
- To enroll properties in RTO, the customer cannot have a past-due balance on any other accounts.

STREAMLINE BILL PAYMENT

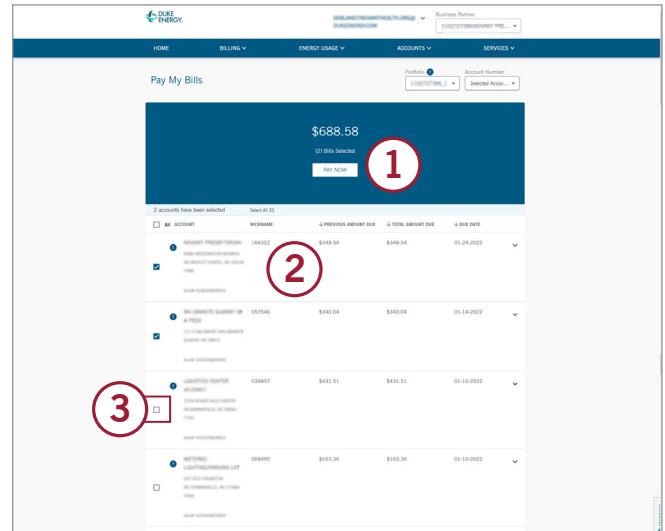

Pay My Bills Page

Upon signing in, the total outstanding balance on your account(s) will display in the dark blue frame. This will include all the outstanding **billed** amounts currently due. Click “View/Pay Bills.”

On the **Pay My Bills** screen, you can:

1. **Initiate the payment process immediately by clicking Pay Now (1).**
2. **View the detail for any of your accounts by clicking on them (2).**
3. **Select one, multiple or all accounts to pay.** The total will adjust based on the accounts you select. Then Pay Now to initiate payment for the selected accounts (3).

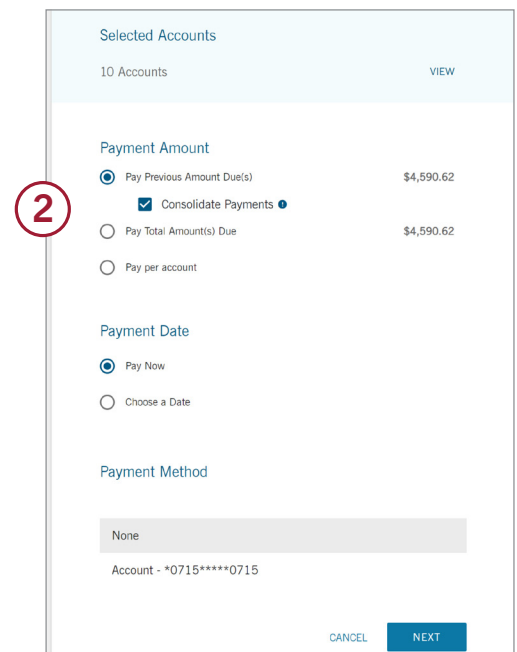

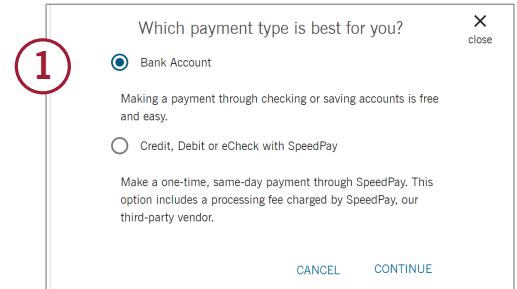

Tip: If your account due dates are spread across the month and you would prefer to align them to one or two different times of the month for easier payment, use Pick Your Due Date to realign accordingly. Then you will be able to select all you want to pay in one transaction going forward.

Making Digital Payments

Once you select Pay Now, you will be guided through the process to pay your bill online, and you will be presented with several options:

- **Source of Payment:**
 - » If you are signed in to your online account, **you can pay digitally for FREE using a checking or savings account (1).**
 - » You may also choose to pay using the Speed Pay service through a vendor who will charge a fee for business accounts. This does provide the option of paying with a credit or debit card.
- **Consolidated or Individual Transactions:** You also have the option of sending a multi-account payment through your bank as one consolidated transaction or individual transactions for each account. If you want your payments consolidated into one bank transaction, check the **Consolidated Payments** box as shown (2). If you leave the box unchecked, each bill will process individually through your bank. As soon as your digital payment is processed, it will be immediately reflected in your account balances and your total amount due on the dashboard.

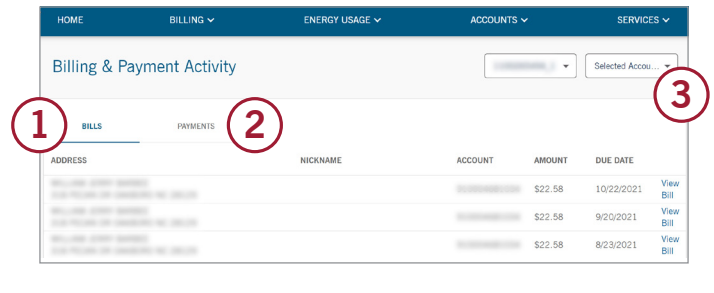

Billing and Payment Activity

Easily view up to 24 months of billing and payment history in one consolidated view.

1. Select **Bills** to view the invoice amount and due date for individual or groups of accounts, as well as view a PDF version of the monthly bill **(1)**.
2. Select **Payments** to view payments posted and the status of those payments **(2)**.

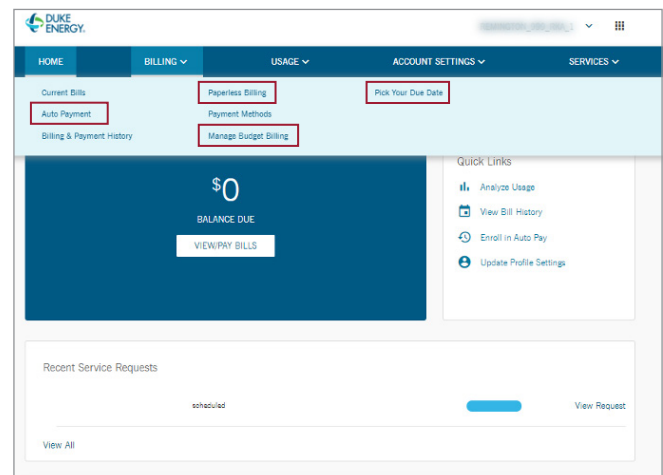

Note: If you want to narrow your view to only one account, select that account in the upper-right corner **(3)**.

Billing and Payment Programs

Under the Billing tab, you can access programs that align billing and payment to fit your business. Selecting each of the programs below will take you to a page that shows eligibility and enrollment status and allows you to enroll or unenroll in that program for each of your accounts.

- **Paperless Billing** – Move all your billing to this digital portal to eliminate paper bills. You can pull up PDF versions of your bills for the past 24 months at any time.
- **Autopay** – Automatically pay your bill with a selected payment method on the bill due date.
- **Pick Your Due Date** – Set your monthly due date at a time that works best for your business. If you have multiple accounts, align them to the same due date to make bill payment easier.
- **Budget Billing** – Manage your cash flow by leveling out your monthly bills to avoid seasonal highs and lows or spikes caused by unusual weather activity.

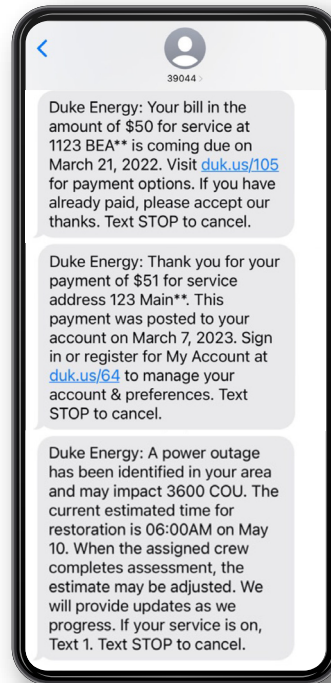

STAY IN THE KNOW

Billing, Payment, Outage and Service Notifications

The Business Experience has expanded the number and types of notifications you can configure for your business to bring relevant information to the right people in your company via text, email or automated phone message when:

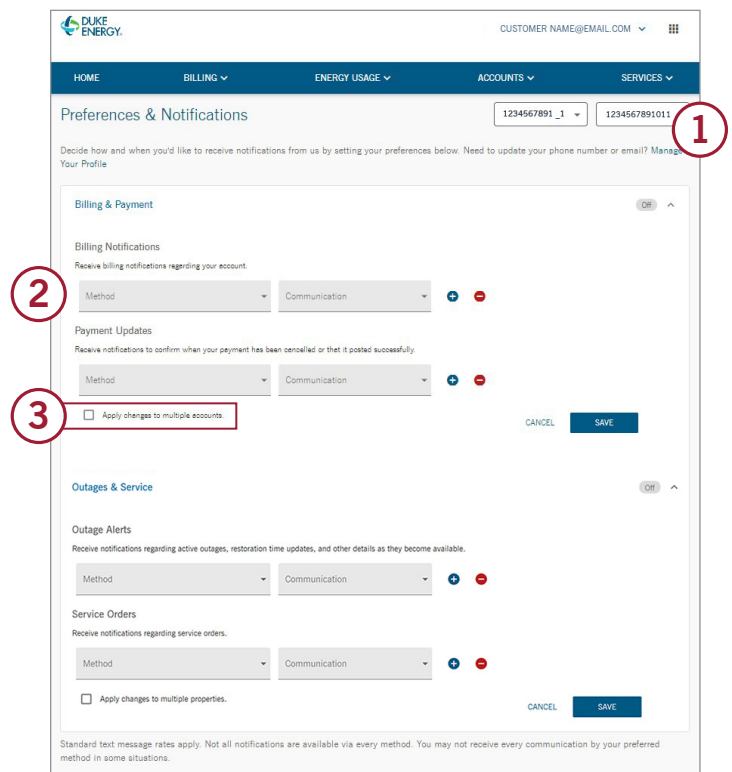

- Your new bill is ready to view
- A payment is coming due
- A payment has been successfully posted to your account(s)
- An issue occurred and a payment was not successful
- An unplanned outage occurs due to weather or equipment damage
- A planned maintenance outage will occur and we want to notify you in advance
- You've made a service request and we have status updates for you

Under the **Accounts** tab, choose Preferences and Notifications. Set up your payment notifications in three steps:

1. **Update Your Profile:** Notification options pull from the phone numbers and email addresses set in your main profile. You can add up to 10 email addresses and 10 phone numbers. Make sure you have updated your profile with the information needed before configuring your notifications (1).
2. **Select Notification Recipients:** Under Billing & Payment, configure the combination of notifications that works best for your business by matching any combination of email, text or phone call to any of the addresses/numbers listed in your profile (2).
3. **Apply Selections to Multiple Accounts (Optional):** For customers with multiple accounts, select the other accounts to which you want the same preferences applied. You can go back and edit individual accounts at any time (3).

A detailed overview of setting your notification preferences can be found on the Business Resources page under **Preferences and Notifications – Business Customer Guide**.

Preferences & Notifications

Decide how and when you'd like to receive notifications from us by setting your preferences below. Need to update your phone number or email? [Manage Your Profile](#)

Billing & Payment

Billing Notifications
Receive billing notifications regarding your account.

Method: [Dropdown] Communication: [Dropdown] [+] [-]

Payment Updates
Receive notifications to confirm when your payment has been cancelled or that it posted successfully.

Method: [Dropdown] Communication: [Dropdown] [+] [-]

☐ Apply changes to multiple accounts

Outages & Service

Outage Alerts
Receive notifications regarding active outages, restoration time updates, and other details as they become available.

Method: [Dropdown] Communication: [Dropdown] [+] [-]

Service Orders
Receive notifications regarding service orders.

Method: [Dropdown] Communication: [Dropdown] [+] [-]

☐ Apply changes to multiple properties.

Standard text message rates apply. Not all notifications are available via every method. You may not receive every communication by your preferred method in some situations.

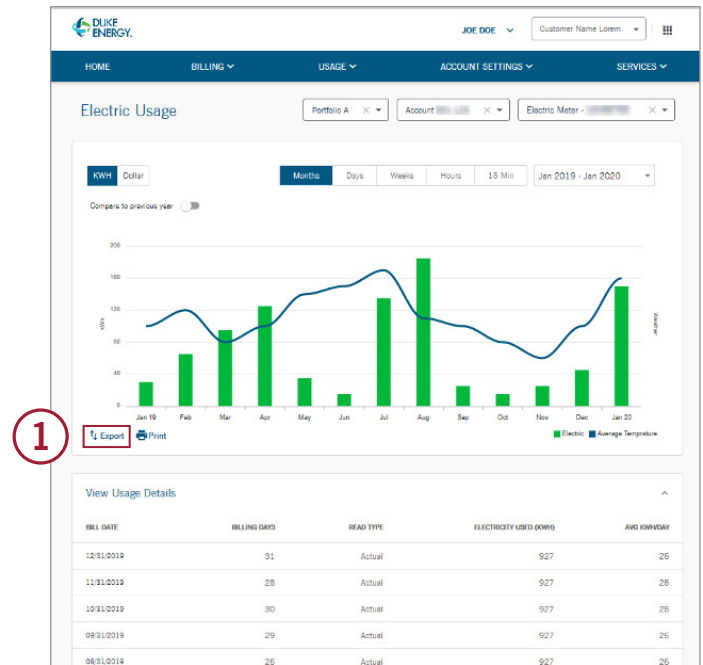

TRACK AND MANAGE ENERGY USAGE

View and Download Usage Data

Under the **Energy Usage** tab, you can view analytics of your energy usage – including usage details and graphical views – based on various snapshots of time. Choose from yearly, monthly (bill cycle), weekly or daily – down to 30-minute or 15-minute increments.

Downloadable data allows you to **export usage (1) to spreadsheet formats** to combine data and integrate it with other data points in your organization.

Note: These snapshots are of individual accounts and may vary based on the meter type for that individual account.

Compare Business Rate Options

Determine whether your accounts are set up on the most favorable rate for your usage patterns. The rate comparison tool allows you to see the differences available rates could make based on your actual usage.

Navigate to the Rate Analysis tool by selecting **Usage** and **Rate Analysis**.

1. Select individual meters/accounts to compare rates. Only available and eligible alternative rates will be displayed (1).
2. Export the results of the rate analysis to a PDF for further review (2).
3. Call Customer Care or your account executive to change your rate (3).
